

Skills

- **Angular**/**NgRx**/**RxJS** and **React**/**Redux** to build complex and scalable enterprise web applications that remain performant, secure, and maintainable across time.
- **HTML5**, **CSS3**, **JavaScript** with a focus on accessibility, cross-browser support, and responsive design.
- Leading within **Agile Scrum** teams that deliver at pace and scale via **CI/CD**.
- Front-end integrations for **.NET REST APIs**, payments, maps, messaging, PDF generation, and **CMS**.
- **Unit testing**, **integration testing** and **E2E testing** with **Jest**/**Karma**/**Playwright**.
- Application monitoring via Azure's **Application Insights** and **OpenTelemetry**.

Professional Experience

Rockpool Digital

Rockpool is a digital agency delivering bespoke web applications for some of the UK's biggest brands.

Senior Front-End Developer Sep 2023 - Present

Leading a team of 5 front-end developers, overseeing architecture, dependencies, and best practice across all of our front ends. Engaged in cross-team collaboration, chairing team meetings, 1:1s, and supporting junior developers in their progression. Frequently workshopping client requirements with a focus on technical feasibility, risk mitigation, and delivery timelines.

Oversaw a substantial reduction in hotfix deployments from an average of 1 per fortnight to <1 per quarter after overhauling our front-end testing approach, running workshops on Jest/Karma, and setting clear 'definition of done' expectations.

Angular Developer Oct 2022 - Aug 2023

Turned around one of our most important projects - delivering >5x performance gains to application KPIs and making previously impossible asks possible - by writing a one-of-a-kind JS framework that enabled us to push compute out to end user devices.

Oversaw self-reported developer stress scores fall by 47% after a herculean amount of refactoring coupled with redefining our approach to state management, earning myself the *Change Catalyst* quarterly award.

Junior Front-End Developer Jan 2022 - Sep 2022

Delivered features, 3rd-party integrations, and ticket resolutions with ease, far exceeding expectations and earning myself the *Team Player* quarterly award during my first quarter at the company.

Education

M.Sci Computer Science (1st class, 4.0 GPA) 2016 - 2021
University of Birmingham

About me

Front-end engineer with experience working for FTSE 250 clients and a high-growth startup. My current ambition is to lead a front-end team with more impact or transition to a full-stack role with more scope. Outside of work you'll find me in the kitchen cooking something impractical, fussing over my coffee, attending local JS meetups, or at my desk tackling an eclectic and ever-growing pile of books.
