

Senior front-end engineer with experience working for FTSE 250 clients and a successful startup. Expert at all things front-end but my long-term ambition is to become a full-stack developer.

Outside of work you'll find me in the kitchen cooking something impractical, fussing over my coffee, attending local JS meetups, or at my desk tackling an ever-growing pile of books.

Skills

- Leveraging **Angular**/**NgRx**/**RxJS** to build enterprise web applications that remain performant, secure, and maintainable across time, integrating with **.NET (C#, ASP.NET)** APIs, **GraphQL**, and **CMS** platforms.
- **HTML5**, **CSS3**, **JavaScript** with a focus on accessibility, cross-browser support, and responsive design.
- Leading and mentoring within **Agile Scrum** teams that deliver at pace and scale via **CI/CD**.
- Collaborating with UI/UX designers, product owners, and clients on technical feasibility, project roadmaps, and architectural approaches to ensure consistent, efficient, high-quality delivery across time.
- Unit testing, integration testing and E2E testing with **Jest**/**Karma**/**Playwright**.
- Application instrumentation and monitoring via **Azure**, **Application Insights** and **OpenTelemetry**.

Professional Experience

Rockpool Digital (2 years, 9 months)

Rockpool is a digital agency delivering bespoke web applications for some of the UK's biggest brands.

Senior Front-End Developer Sep 2023 - Present

Lead a team of 5 front-end developers, overseeing architecture, dependencies, and best practice across all our front end applications. Engaged in cross-team collaboration, chairing team meetings, 1:1s, and supporting junior developers in their progression.

Working to document and roll-out front-end best-practices for the business, integrating a new SPA with a headless CMS via GraphQL, and leading the charge on a new approach to unit/integration testing.

Angular Developer Oct 2022 - Aug 2023

Turned around a project for our biggest client, delivering >5x performance gains to application KPIs, by writing a one-of-a-kind JS framework that enabled us to push compute out to end user devices.

Oversaw a dramatic fall in self-reported developer stress scores through redefining our usage of NgRx coupled with a herculean amount of refactoring, earning myself the *Change Catalyst* quarterly award.

Junior Front-End Developer Jan 2022 - Sep 2022

Delivered features, 3rd-party integrations, and ticket resolutions, exceeding expectations and earning myself the *Team Player* quarterly award during my first quarter at the company.

Education

M.Sci Computer Science (1st class, 4.0 GPA) 2016 - 2021
University of Birmingham
